

Never miss another call. Ava answers it for you.

The AI receptionist built for home service contractors — plumbing, HVAC, electrical, roofing, landscaping, and more. Live, 24/7, in your own voice.

HOW IT WORKS

1**Call comes in**

Forwards from your existing number — no new number to advertise.

2**Ava triages live**

Asks what's wrong, where, and how urgent — trade-specific, not a generic script.

3**Photo → estimate**

Texts an upload link. One photo becomes a real, line-item ballpark estimate.

4**You approve, they're booked**

Real calendar availability. You review and approve the time — then your customer gets the confirmation text.

WHY CONTRACTORS CHOOSE DISPATCHAI

- ✓ **Works with your number**
Conditional forwarding — nothing new to put on the truck or the website.
- ✓ **Gets the address right, the first time**
Every spoken address is checked against a real address database on the call, so a mishearing gets corrected before it ever reaches your dashboard.
- ✓ **Real calendar booking**
Connected to your own Google Calendar — you approve every time before it's confirmed.
- ✓ **Live dashboard**
Every call, transcript, estimate, and booking in one place — for you and your team.
- ✓ **Real trade expertise**
Bespoke triage logic for 40+ trades, including safety-first handling where it matters.
- ✓ **Human-reviewed estimates & bookings**
AI drafts the estimate and proposes the time. You review, edit, and approve both before your customer sees them.
- ✓ **Multilingual by default**
English, Spanish, French, Nigerian Pidgin, Yoruba, Igbo, and Hausa.

See it live — no phone number needed

Call a real plumbing job into Ava, right in your browser.
